***Specification***

1. The abstract filed on August 17, 2006 is acceptable by the examiner.

***Claim Objections***

2. The objections regarding the multiple dependent claims are withdrawn since the claim dependency is in alternative form.

***Claim Rejections - 35 USC § 112***

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claims 1-7, 9, and 10 are rejected as failing to define the invention in the manner required by 35 U.S.C. 112, second paragraph.

5. Claims 1-7, 9, and 10 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

6. The claim(s) are narrative in form and replete with indefinite and functional or operational language. The structure which goes to make up the device must be clearly and positively specified. The structure must be organized and correlated in such a manner as to present a complete operative device.

7. Claims 1-7, 9, and 10 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Overall, the claim limitations are convoluted

and jumbled. Examiner cannot discern the claim limitations – they do not present a clear and logical format. For example:

8. Claim 1 recites the limitation "the distance of airborne ultrasound location of an intruder", line 2.

9. Claim 1 recites the limitation "the quasi-hemispheric, dome-type volumetric room", lines 3 and 4.

10. Claim 1 recites the limitation "the spatial multi-echelon openwork structure", lines 6 and 7.

11. Claim 1 recites the limitation "the particular task", line 8.

12. Claim 1 recites the limitation "the central echelon", line 9.

There is insufficient antecedent basis for these limitations in claim 1. In addition, examiner has discovered numerous claim limitations that lack antecedent basis in claims 2-7, 9, 10.

### ***Conclusion***

13. An examination of this application reveals that applicant is unfamiliar with patent prosecution procedure. While an inventor may prosecute the application, lack of skill in this field usually acts as a liability in affording the maximum protection for the invention disclosed. Applicant is advised to secure the services of a registered patent attorney or agent to prosecute the application, since the value of a patent is largely dependent upon skilled preparation and prosecution. The Office cannot aid in selecting an attorney or agent.

A listing of registered patent attorneys and agents is available on the USPTO Internet web site <http://www.uspto.gov> in the Site Index under "Attorney and Agent Roster." Applicants may also obtain a list of registered patent attorneys and agents located in their area by writing to the Mail Stop OED, Director of the U. S. Patent and Trademark Office, PO Box 1450, Alexandria, VA 22313-1450.

14. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
